PERI 180 ROTATING INFANT CAR SEAT - DESERT WONDER

SKU: IC364GKF

Make their world go 'round with Peri™ 180°, our new rotating infant car seat featuring FlexiSpin rotation technology. Peri makes getting your little one in and out of their car seat easier than ever and reduces back strain. It is also the lightest rotating infant car seat available at under 8 lbs. (without canopy and inserts, which weigh approx. 1 lb.), so carrying it is a breeze. Peri 180 Rotating Infant Carseat Top Features: For rear-facing babies from 4–30 lbs. and up to 32". Peri 180° also features TensionFix™, which solves the most common installation problem 7 out of 10 parents unknowingly have—loose vehicle belt tension. TensionFix is our patent-pending red-to-green indicator that shows you when your belt has tension. We designed Peri with thoughtful features to make the journey with your little one easier for you both. Parents will love that they don't need to rethread the QuikFit harness when baby grows, as the headrest and harness can be easily adjusted at the same time with one hand. 5 recline positions for a better fit during installation. Our new canopy design zips out to extend, providing full-coverage sun protection and privacy for your little one. Easy-to-use magnets secure the canopy to the car seat, and they're so quiet, you won't wake baby when you decide you need full coverage. FlexiSpin provides 180° seat rotation, so getting babies in and out of their car seats is easy and helps reduce back strain. TensionFix™, Maxi-Cosi's patent-pending red-to-green tension-sensitive indicator on the seat's base shows you when your belt has tension. At just under 8 lbs. (without canopy and inserts, which weigh approx. 1 lb.), Peri is the lightest rotating infant car seat available. The QuikFit 6-position harness means no need to rethread the harness as baby grows—headrest and harness can be easily adjusted at the same time with 1 hand. 5 recline positions help ensure a better fit during installation. New canopy design zips out to extend for full-coverage sun protection and privacy, and easy-to-use magnets secure the canopy to the car seat.

Shell designed with ClimaFlow™ technology for added ventilation. Fits rear-facing babies 4–30 lbs. and up to 32". Features a load leg and anti-rebound bar for added stability. Convenient stay-in-car base and LATCH connectors for quick installation. Extra-plush padding on the removable infant head and lumbar inserts for a cozy, secure fit for tiny travelers. All fabric and cushions are machine-washable. PureCosi™ fabrics are made without wool or added fire retardant treatment—better for your child and our planet. Visible belt paths for secure, on-the-go installation without a base (taxi-mode). 1-hand release from base and stroller. Compatible with select Maxi-Cosi strollers for a complete travel system. Meets or exceeds all federal safety standards. Side Impact Protection (SIP)
